PIH Health’s vision, “Patients First,” solidifies the bond between every member of our community and those who provide care, not solely within our walls but throughout our geographic area. To achieve our simple but ambitious vision, we must first thoroughly understand the current and future needs of those we serve. Using our Community Health Needs Assessment as a starting point, we develop innovative ways to provide accessible healthcare and resources for the communities we serve.

As the healthcare landscape continues to change, we continually evaluate how we can best provide exceptional care to our community, not only when people are sick, but to help keep them well.

Within this past year, PIH Health entered into an affiliation with Keck Medicine of the University of Southern California (USC) to develop and operate medical services to enhance access and quality healthcare for the residents of eastern Los Angeles County. For many years, Keck Medicine of USC has served as a primary quaternary referral center for PIH Health, and this affiliation enhances the level of care we provide. We are pleased that Keck Medicine of USC physicians are working alongside PIH Health physicians, providing care and bringing new expertise to our patients.

Expanding the services we offer to meet the healthcare needs of our community is our top priority. With nearly 100 years of service, the vision of helping patients achieve their best health permeates throughout our two hospitals, 18 medical offices, dozens of community affiliations and programs, numerous supporters, and generous donors who share this same focus and readiness to provide care to those who need us.

We are appreciative of the many new opportunities that make our “Patients First” vision a reality, and our hope is continued wellness for those we serve.
