Why am I receiving different bills for the same visit?
Your bills include all of the services you received during your visit with us. It is common to receive more than one bill, such as a bill for your hospital visit and a separate bill for physician services. Types of bills you may receive include:

**Hospital bills:** these bills may include fees for your room, meals, nursing care, hospital supplied therapy, surgeries and lab tests as well as Emergency Room services.

**Physician bills:** these bills may include office visits, consultations, reviewing lab results and surgeries. If, during your stay, you required tests or treatments, you may receive bills from physicians you did not see in person. These bills are for their professional services such as diagnosing and interpreting test results. If you have any questions about charges on these physician bills, please call the number printed on your bill.

**In-network and out-of-network bills:** your health insurance may contract with certain providers to provide discounted rates for care. If you have questions about what your insurance covers, which providers are in-network or out-of-network, copays, and deductibles, please call your insurance company directly.
