COMMUNITY BENEFIT

Investing in Health, Strengthening Communities

We take pride in being our communities' health and wellness partner. Our Community Health Needs Assessment findings help us address the greatest needs: disease prevention and management, preventative practices, food insecurity, homelessness, and access to mental health and substance use prevention and treatment resources. We provide financial assistance for those unable to afford medically necessary care, fund local nonprofits' efforts to meet community health needs, and support collaborative efforts that address social determinants of health. We also help to educate the next generation of healthcare professionals.
